✅ Recommendations

🔴 **2 instance(s) are Overutilized.** Consider upgrading to a larger instance type or distributing workload across multiple instances to prevent performance degradation.

🟡 **3 instance(s) are Underutilized.** Consider stopping or downsizing these instances. Estimated monthly savings if stopped: **$22.46**.

🟢 **3 instance(s) are Healthy.** These instances are operating within optimal CPU range. No action required.

💡 **Average CPU across all instances is 32.81%.** Overall utilization is within healthy range.
